

Newsletter of Team India Team India Managers Ltd. Franchising Nation

From the President & CEO's Desk

Franchising is a rapidly growing industry in India with a lot of local and small brands going the franchise way. TIM Ltd is established to

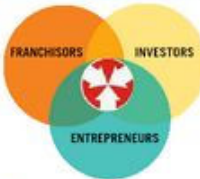

give a boost to this industry aiming towards its expansion in the right way. To deliver what we promise, we have recognized the importance of four indispensable entities such as Entrepreneurs, Investors, Franchisors and Property and endeavor to maintain a business which is profitable for all the parties involved.

Also, we realize the importance of educating and spreading the concept of franchising and retailing in India and hence have established an academy called the 'TIM Academy', the benefits to the students being that they can either be recruited by the various franchise systems or get the opportunity of becoming our entrepreneurs in our new franchisee ventures.

Our concept thus is not only an impetus to the entire franchise industry, but also a unique step towards achieving a new and confident nation, a franchising nation!

Government may franchise Brand IIT

Unable to cope with the growing demand for technical education, the government may give the private sector a bigger role to play. The Planning Commission has suggested that private companies be allowed to build and run Indian Institutes of Technology under brand IIT. Its great news," said Colonel Rajender Singh, registrar and official spokesman, IIT Delhi. "There is a marginal difference in the marks of the top 5,000 students who qualify and the next 5,000 or so who don't. The new IITs would accommodate more students."

This would give more students access to the IIT standard of education and the number of high quality engineers in the

country will increase substantially at no cost to government.
